

I am attending the first year of GP speciality training program.

In these last years I have been torn between two big passions of mine: general practice and ophthalmology; after almost a year doing a research project concerning Optical Coherence Tomography in the evaluation of Age-related Macular Degeneration and, on the other hand, helping the GP of my town, I finally made up my mind: now I know that I want to become a general practitioner.

- ✚ I am extremely interested in General Medicine, all aspects of it: the clinical, the interventional and the research ones;
- ✚ I am interested in gaining experience abroad, finding challenging environments and learning from the best; I am working hard to achieve such an objective because I want to be an independent, complete and competent medical doctor.
- ✚ I am a strong-willed, clever type of person, used to facing and overcoming challenges and I am sure I will brave the challenge of facing seriously any project in my life.

Education & training

- High-School Diploma (100/100), Liceo C. Tenca, Milan
06/2012
