

# URGENT: FIELD SAFETY NOTICE (REMOVAL) GLOBAL UNITE STEMS (SELECT LOTS ONLY)

Dear Valued Customer,

Please be advised that DePuy (Ireland) is initiating a voluntary removal of the Global UNITE Stem sizes listed in Table 1 (see below). The GLOBAL UNITE Platform Shoulder System is intended for cemented or uncemented total or hemi-shoulder arthroplasty. Please carefully review this document for the steps that you should take to respond to this medical device removal and distribute to appropriate personnel at your facility who may use the subject product.

#### **Reason for the Medical Device Removal:**

The subject product is being removed because DePuy (Ireland) has determined that select lots of Global UNITE Stems may have an undersized spigot bore diameter (See Figure A).

### **Potential Patient Impact:**

The undersized spigot bore diameter of the stem may impact the index procedure in the form of surgical delay and/or bone damage.

- Surgical delay may occur if another stem needs to be obtained to finalize the procedure.
- Bone damage may be observed if the original stem size cannot mate with the proximal body and a
  different stem size is used by the surgeon because a duplicate of the original stem size is unavailable.

For purposes of clarity, even if the diameter of the spigot bore stem is undersized, the screw mechanism may still engage with the proximal body, resulting in a secure assembly of the components (See Figure B). However, an interference condition may be observed due to compression between the spigot and the spigot bore of the stem (See Figure C). In such a scenario, separating the proximal body from the stem may not be possible without surgical delay and/or bone damage. Thus, in cases when the surgeon, in his or her professional opinion, concludes that a revision procedure with a well-fixed stem is necessary, the surgeon should exercise care in removing the stem in conjunction with the proximal body.

Health care providers who have treated patients using the subject lot should continue to follow those patients pursuant to the health care provider's standard of care. No adverse events have been reported for this issue.

## **Requested Actions:**

Our records show that your facility received one or more of the products in Table 1. Please take the following actions:

- 1. Examine your inventory immediately to determine if you have the select lots and quarantine the product.
- 2. Return the subject product(s) using the normal returns process. Work with your sales consultant to return subject product(s). To receive replacement product(s) or reimbursement, customers must return the products subject to this removal.
- 3. Review, complete **all** fields, sign, and return the attached business response form (BRF) on the last page of this letter to OneMD-Field-Actions@its.jnj.com within three (3) business days of receipt of this Removal Letter. Please include in the email subject: FA 2044436 2021 GLOBAL UNITE Stems with undersized Spigot Bore Diameter.
- 4. Forward this Removal Letter to any personnel in your facility who need to be informed.
- 5. If any of the product(s) subject to this Removal have been forwarded to another facility, contact that facility and provide a copy of this Removal Letter to the relevant personnel.
- 6. Post a copy of this Removal Letter in a visible area for awareness of this Removal.

This medical device product removal has been reported to the appropriate Health Authority. We apologize for any inconvenience that this removal may cause and appreciate your cooperation with our request. If you have any questions, please contact your local DePuy Synthes Sales Consultant. For Medical Information request, please visit our website: https://www.jnjmedicaldevices.com/mir.

Thank you for your attention and cooperation.

Kindest regards,

#### Kimberly Long, Senior Field Action Coordinator
