

# Field Safety Notice

Device: Trinity Acetabular Shell

Part Numbers: See table below

Lot Numbers: See table below

Action: Voluntary device withdrawal

Date: February 3, 2016

### Dear Customer,

The purpose of this letter is to advise you that Corin Limited is voluntarily recalling specific lot numbers of the Trinity Acetabular Shell identified in the table below.

#### Intended Use:

The Trinity Acetabular System is intended for use in total hip arthroplasty in skeletally mature patients, to provide increased mobility and reduce pain by replacing the damaged hip joint articulation where there is evidence of sufficient sound bone to seat and support the components.

### **Reason for the Voluntary Recall:**

Corin Limited has identified the potential for abrasion of the sterile barrier pouches of the new packaging system, which was introduced in November 2015. This issue is related only to the Trinity Acetabular Shell devices.

There have been no product complaints reported from the field with this issue. If this failure were to occur it could potentially render the product non-sterile.

### Risk to Health:

The implantation of an unsterile device into a patient could lead to infection.

Detection in some situations may be difficult, therefore Corin is recalling all identified product with the new packaging system for the Trinity Acetabular Shell.

Please check your records from November 2015 for patients who have undergone surgery and may have received one of these devices. The affected part numbers and lot codes are provided in the table below.

# Actions to be taken by the Customer:

All recalled product should be returned to Corin Limited, including product which have been consigned to hospitals.

Please complete and sign the attached customer response form indicating product disposition and quantities to be returned.

Please complete the form even if you have no affected product to return. Return the form by email to the address quoted on it.

## **Product and Distribution Information:**
