

BTSF – RISK ASSESSMENT IN THE FOOD CHAIN

COURSE 6 – Risk assessment applied to animal health and welfare

Fact-sheet

The harmonisation of risk assessment methodologies has been identified as a priority area of the Strategy for Cooperation and Networking between the EU Member States and EFSA, since harmonisation would help in the development of high quality scientific opinions that are recognised as truly authoritative. 2008 EFSA Working Group Report on "Fostering harmonised risk assessment approaches in Member States" pointed out how countries organised risk assessment differently at the time. Many of the procedures in the countries appeared to be in line, or at least not in conflict, with procedural aspects within EFSA, however highlighting discrepancies in procedural aspects of risk assessment, mostly regarding declarations of interest, public register of risk assessment requests, procedures concerning the selection of experts, the interaction with stakeholders and between risk assessors and risk managers during the risk assessment process.

The present training programme will address issues listed above through the adoption of a practical approach, aimed to increase knowledge of Competent Authorities and scientists from public institutions and national authorities involved in food chain risk assessment in order to increase the level of expertise and harmonisation.

OBJECTIVES

The main goal of the training programme is to disseminate best practices for the implementation of principles and methods of food chain risk assessment, improving knowledge of this complex area of work and ensuring consistent and high implementation standards across the European Union.

Specific objectives are:

- Promoting reduction of discrepancies in procedural aspects of risk assessment;
- Contributing to the harmonisation of risk assessment approaches;
- Contributing to increasing transparency and building trust amongst Member States' authorities in each other's risk assessments;
- Disseminating best practices for risk management and communication;
- Promoting exchange of experience in order to increase the level of expertise and harmonisation of approaches.

TOPICS

The following topics will be covered during the training sessions, both from a theoretical and practical standpoint.

1. Introduction to risk assessment for animal welfare
2. Four steps of RA in animal welfare. What makes RA for Animal Welfare unique
 - Hazard Identification
 - Hazard Characterization
 - Exposure Assessment
 - Risk Characterization
3. Risk management aspects specifically related to animal welfare risk assessment:

Neither the Commission nor any person acting on its behalf may be held responsible for the use which may be made of the information contained therein

- Availability and use of existing data;
 - Unmitigated versus mitigated risk assessment and assessment of management options.
4. Introduction to import risk assessment (IRA) in the field of animal health and its legal framework, examples of risk assessments for animal health;
 5. Data requirements for IRA in the field of animal health
 - The different steps of IRA in the field of animal health;
 - Problem formulation:
 - Assessment of introduction and spread of a disease or disease agent
 - Assessment of potential consequences associated with the introduction and spread of diseases
 6. Identification of appropriate risk management options in animal health risk assessment
 - Mitigated versus non-mitigated risk assessment
 - Options for the risk prevention or risk reduction
 - Assessment of the effect of risk management options on the level of risk
 7. Short introduction to Risk Communication.

Besides, group works, exercises and case studies will be included.

A test of knowledge will be carried out by all participants at the beginning and at the end of each workshop.

FACTS AND FIGURES

During the second phase, 2 five-day training sessions will be organised and implemented, and approximately 20 people will attend each training session.

TRAINING LOCATIONS AND CALENDAR

Training sessions will be implemented according to the following calendar.

Year	Training sessions	Locations	Proposed dates
2024	TS 1	Warsaw, Poland	18-22 March 2024
2025	TS 2	Valencia, Spain	20-24 January 2025

PARTICIPANT SELECTION CRITERIA

The training will be addressed to official from Competent Authorities and scientists from public institutions and national authorities involved in food chain risk assessment (with a focus on risk assessment applied to animal health and welfare). They must have worked in functional areas of food chain risk assessment with a minimum of 3 years of professional experience or have had experience of setting up and implementation of food chain risk assessment in a Competent Authority (covering areas of food/ feed safety, animal health or animal welfare).

PROJECT MANAGEMENT AND TUTORS' TEAM

The project will be implemented by the company OPERA srl in consortium with NSF Euro Consultants SA. The project's staff includes Mr. Claudio Bompard (CEO of OPERA) as Project Manager, Mr. Jan Arend Stegeman as training coordinator, Mr. Luigi Pisanello and Ms. Guendalina Mamma as Event Manager and a pool of 5 highly qualified tutors from 4 MS: Ms. Aline De Koeijer, Ms. Linda Keeling, Mr. Tsviatko Marinov Alexandrov, Mr. Antonio Velarde and Mr. Antoni Dalmau.
