# Repackaging the narrative

- **The pandemic: a wake up call, time is right (health and inequalities at the core of the metrics in the public agenda)**
- **Make Europe a union of equality but attention to diversities (lessons from PFA and immigration)**
- **It can be done (83 concrete actions), but a step in a longer term journey**
- **Take a longer time perspective, whose potential impact is predicted by the PFA: take care of all the gaps (identified in CA, repeat CA) even as we have not been able to fill them with 83 actions**
- **Also depending on changing external conditions (political orientation...)**

# Repackaging the narrative

- **It works (progress in «do some-more-better»)**
- **Something feasible everywhere: learned how to do it with little data**
- **It can last longer above and beyond JAHEE: not so much through isolated best practice but above all the frame and the menu à la carte of practices and competences**
- **It has been done with cooperative work (in the long term this is Europe): a community of practice of value for future investment**
- **Combine SDH structural approach (deterministic, targeted by the Next Gen EU) vs dispersion within SDH approach (equity lens whenever and wherever possible: responsibility of every local setting)**
